WORK EXPERIENCE

Tata Consultancy Services

November 2024 – Present

AI Engineer

Chennai, TN

- Drove migration of 50+ modules from a single Next.js application into 10 separate microfrontends, serving 20+ developers and reducing build time by 75% while increasing deployment throughput from 50 to 40 per day.
- Led release management for the TCS CBG AI platform, coordinating 3 cross-functional teams (infra, sales, BA) to deliver 25+ monthly deployments with 99.9% uptime and zero critical rollbacks.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Go, Java, SQL

AI & Agents: GenAI, LLMs, RAG, AI SDK, Google ADK, AutoGen, LangChain, LangGraph, Qdrant, Pinecone

Frameworks & Tools: React, Next.js, FastAPI, Effect TS, Node.js, Express, Bun, MongoDB, PostgreSQL, Redis, Kubernetes, Docker, Jenkins

PROJECTS

Agentic AMS Platform

February 2025 – January 2026

Python, Microsoft AutoGen, FastAPI, RAG, Vector Database, Next.js

Live

- Engineered an autonomous multi-agent AMS in Python that reduced MTTR by 63% by automating anomaly detection, incident deduplication, and SOP retrieval using a vector-indexed knowledge base.
- Orchestrated remediation for 4+ weekly incidents through a three-agent Planning-Executor-Validator pipeline with 10 SOPs, achieving 6-minute average response time.

Google GTM Portal

February 2026 – April 2026

Python, Next.js, TypeScript, FastAPI, Google Cloud Storage

Live

- Built a Python/FastAPI backend with Google Cloud Storage to serve 120+ global AI offerings as a unified catalog for Google Cloud Next 2026.
- Developed a Next.js frontend with 96% Lighthouse score and sub-1-second page load times.

Retail Platform

July 2024 – June 2026

Next.js, TypeScript, Go, SQLite, AWS Lambda, Cloudflare

Live

- Built a high-performance frontend with Next.js and Tailwind CSS serving 200+ products with 100% Lighthouse performance.
- Designed a decoupled microservices backend in Go with 5 services deployed via AWS Lambda, utilizing event-driven architecture for inventory tracking, order management, and secure admin control.

Cortex

April 2026 – May 2026

Effect TS, TypeScript, Vector Databases

Live

- Architected an Effect-native ORM for vector databases, achieving 500+ npm downloads and reducing boilerplate by 40%.
- Implemented an adapter pattern for Zvec and PageIndex, enabling portable multi-tenant RAG pipelines across different vector database providers.

Kite

March 2026

AG-UI, TanStack Start, React 19

Live

- Developed a real-time data assistant using React 19 supporting 10+ query types with sub-3-second response times.
- Reduced custom visualization generation time from minutes to seconds through automated chart selection and rendering.

EDUCATION

Amrita Vishwa Vidyapeetham

September 2020 – May 2024

B.Tech in Computer Science and Engineering

Coimbatore, TN

- **Research:** Complex or Irregular Lung Nodule Detection from CT Scans
